

Voluntary Product Accessibility Template (VPAT) Statement

Product Name: eBooks

Version: 2.1

Date: 04/20/25

Accessibility Conformance Report

This Voluntary Product Accessibility Template (VPAT) evaluates the accessibility of our eBooks against the Web Content Accessibility Guidelines (WCAG) 2.1 and Section 508 of the Rehabilitation Act.

Product Description

eBooks are a virtual flipbook solution that provides an interactive reading experience. The product features a visual representation of book pages, on-demand page-turning animations, and an accompanying audio track for enhanced accessibility, providing both audio and visual options for reading the books.

Evaluation Methodology

Accessibility conformance was assessed through a combination of automated testing tools, manual testing, and user feedback, following WCAG 2.1 guidelines and Section 508 requirements.

Summary of Conformance

Our eBooks have been designed with accessibility considerations, including:

- Keyboard navigability for page turning and playback controls.
- Alternative text descriptions for book pages and interactive elements.
- Zoom capabilities for readability.

Known Accessibility Limitations

While we strive for full accessibility, some areas may have limitations:

- Page-turning animations may not be fully perceivable to users with visual impairments.
- Complex page layouts may require alternative text descriptions for better screen reader support.
- Some third-party integrations may not fully conform to WCAG 2.1 guidelines.

Planned Improvements

We are actively working on improving accessibility through:

- Enhanced support for screen readers with structured content markup.
- Additional keyboard shortcuts for easier navigation.
- Expanded user customization options for audio playback and text display.

Feedback and Support

We welcome feedback on the accessibility of our eBooks. If you encounter accessibility barriers, please contact us at:
